### **Invitation to Participate in Research – Analysis of Foreigners’ Needs in Prague 11 City District**

The Analysis of Foreigners’ Needs in Prague 11 City District is carried out within the “Prague 11 City District Foreigner Integration” project which we’ve been implementing in Prague 11 for the fifth year straight.

The analysis is implemented by the Faculty of Science of Charles University. We expect the analysis to provide a deeper insight into the quality of the foreigners’ life in our district and into how our district authorities could be more helpful towards them. We also expect that during this research project we will contact foreigner associations and important players through snowball sampling, who will in turn approach the local community and cultural institutions, as well as social service providers for all target audiences.

**We are looking for foreigners from Prague 11 or for people who already live here, but who have moved to Prague 11 as foreigners within the last 10 years, for conversations as part of the research.**

**If you are interested in sharing your feelings and opinions regarding integration and life in Prague, please contact the researcher Káťa Ignatyeva:**
